

Report of Developing a 3 D model for Dachais Commune

Objective:

- To guide the participants (from the National Park and community of Da Chais) to produce a 3 D Model for Da Chais
- To improve the conservation awareness and reduce the conflict in park boundary through group discussion during the implementation of the Model.

Main activities:

- Gathering primary and secondary data about Da Chais Commune
- To form group of participants from the NP and from community of Da Chais
- Field work related to the development of a 3D map.
- Development of the 3D map for Da Chais Commune
- Discussion and transfer of the primary and secondary information to the Model.

Output:

- A complete 3 D model of Da Chais Commune
- Group discussion sessions on sharing the knowledge and issues with and raising awareness of Da Chais residents on biodiversity conservation of Bidoup Nui Ba National Park.

Developing of 3 D model for Dachais Commune

Participants:
